2016 ANNUAL REPORT

Transforming Lives & Communities

THE LCADA way

WHERE RECOVERY BEGINS

LETTER TO OUR COMMUNITY

Dear Friends of The LCADA Way,

2016 was another exciting and challenging year for The LCADA Way.

Celebrating our 2015 expansion into Medina County, we experienced yet another record year of growth and expanded services to the communities we serve. Our caregivers and clinicians saw marked increases in visits and demand for our services. Battling the opioid crisis head-on, we committed ourselves to work even harder, reaching deeper into our communities with more sponsored events, increased education, and additional health and wellness services.

Our research-based models of care help struggling families with services specifically tailored to meet the needs of those in our treatment network. We worked together with first responders, law enforcement, schools and other recovery centers to drive the disease of addiction from our communities, supporting those on their way to wellness and recovery.

In supporting our growth, and in partnership with Summa Health Care, we opened a new network location at the Summa Health Center at Wadsworth-Rittman. The three-year lease will bring our care, recovery and treatment to patients in Wadsworth and surrounding communities. We also began a new partnership with Primary Purpose Center in Sheffield Township who opened their doors and began admitting residents in November 2015. The space is about 24,000 square feet. At any given time, the center will serve 80 to 100 men living in various stages of sobriety.

Thanks to the generous support of our donors, sponsors and caring individuals, we had our strongest fund raising ever, highlighted by our Pearls of Wisdom Annual Recognition Dinner, an overwhelming success raising over $100,000. Those who attended were treated to an exciting auction and entertained by actor and advocate Steve Ford, son of former President Gerald and Betty Ford. Steve told great stories of his days growing up in the White House, being watched by secret service teams, his career in Hollywood and his personal battle with his addiction.

On behalf of The LCADA Way Board of Directors, we want to express our sincere thanks to you, our friends, who have supported us through the years – you play a key role in helping to improve the lives of individuals and families struggling with mental health and addiction. We also want to thank our dedicated staff who work tirelessly with our customers and their families to find innovative treatment delivery methods in providing the highest quality care possible.

All the best,

Tom and Mark

PROVEN RESULTS. HEALTHY LIVES.
It's simple. Our programs work. We guide our clients through a process of recovery and create healthy lives for themselves and their families.

SUPPORT. EDUCATION. RECOVERY.
Our comprehensive, results-oriented programming focuses on the individual and strengthens families and communities.

LEADING THE WAY.
We are leaders in our field. You can trust our results that tomorrow can hold the promise of a better future.

MISSION
To transform individual lives, families and communities suffering from alcohol abuse, substance abuse and behavioral health issues.

VISION
To develop The LCADA Way as a Center of Clinical Excellence for education, prevention and treatment of alcohol abuse, substance abuse and behavioral health issues.

The LCADA Way Opens Its Wadsworth Wellness Center

In the News August 2016:

The LCADA Way, in partnership with Summa Health Care, opened a new network location in June at the Summa Health Center at Wadsworth-Rittman. The three-year lease will bring services including outpatient and day treatment to patients in Wadsworth and surrounding communities.

"The LCADA Way's vision is to become a center of excellence for treatment, education and prevention of substance abuse and addiction," said Thomas Stuber, President and CEO of The LCADA Way, "To meet this goal, we have designed programs and re-engineered services to best serve those individuals and families suffering from narcotic and heroin addiction."

The treatment center comes in the wake of the ongoing opiate addiction epidemic, which claims the lives of about six people per day in Ohio alone. Experts estimate that 200,000 Ohioans — a population rivaling that of Akron — are addicted to opiates right now.

Summa officials said they hope LCADA's facility will help curb the problem in Wadsworth. "We believe this partnership will be of great benefit to the community," said Molly Menton, site administrator at Summa's Wadsworth Center, "and we look forward to helping our citizens fight this terrible disease of addiction."

Wadsworth Mayor Robin Laubaugh agreed. "We are determined to help end these tragedies and help those residents who are in need of these vital services," she said.

The LCADA Way will join other outpatient services offered by the former Wadsworth-Rittman Hospital, which shuttered inpatient services in 2014.

YEAR IN REVIEW HIGHLIGHTS

The LCADA Way Partners with Primary Purpose Center

In the News November 2016:

Primary Purpose Center, 3222 North Ridge Road in Sheffield Township, opened its doors to take in its first residents on November, 14. The space is about 24,000 square feet. Depending on the need, the center will serve 80 to 100 men living in various stages of sobriety.

"Our mission is to take somebody off the street that is basically very confused with an addiction, whatever the addiction may be, and take them to be a person that is responsible and productive in society," said Chuck Craft, one of the co-founders of Primary Purpose.

The facility planners have raised money to pay for about $500,000 worth of renovations to create the bedrooms, meeting rooms, chapel, dining room and kitchen inside the facility.

"We bit off more than we could chew," Ed Barrett, facility co-founder said. "It was quite a learning experience," but it became an "awesome" learning experience with the cooperation of Sheffield Township and state inspectors, he said. "The community support has been outstanding for sure."

So far, Primary Purpose has received funding and support from The LCADA Way, the Alcohol and Drug Addiction Services Board of Lorain County, the Ohio Department of Mental Health and Addiction Services and other donors.

Primary Purpose offers a three-phase approach for men battling drugs and alcohol. Residents will start with recovery, then stay in recovery while looking for work. Men who maintain sobriety and want to stay, can pay rent to live in a sober environment at Primary Purpose. There will be some free beds for those in need.

"The biggest thing about our facility is, there's no reason that you have to leave," Barrett said. "There's no time frame on it." Living at Primary Purpose is voluntary; it is not a court-ordered detention facility. There will be strict rules for residents, who must contribute to the chores needed to keep the center clean and running smoothly.

The process takes time to break addictions, the trustees said. "Heroin is not something you can just put down and become normal again," Barrett said.

(top) Co-founders Ed Barrett & Chuck Craft, Primary Purpose
(bottom) Chuck Craft and Men's sleeping area

"You need 35 weeks for your brain and your body to recuperate. That's a long time."

Said Thomas Stuber, President & CEO of The LCADA Way, "we are pleased to be partnering with Primary Purpose. Through partnerships like this, we can reshape and improve the quality of treatment and recovery services and ultimately improve outcomes. This will save lives."

The organizers included Lorain County Common Pleas Judge John Miraldi, Lorain Municipal Judge Mark Mihok, county Domestic Relations Judge-elect Sherry Glass and state Sen. Gayle Manning of North Ridgeville, the trustees said.

PEARLS OF WISDOM ANNUAL RECOGNITION DINNER

The Howard Marusa Community Service Award

Presented to community leaders in recognition of their dedication and commitment to helping those impacted by drug and alcohol addiction.

Sandy Marusa presenting the Howard Marusa Community Service Award to Brian Frederick, President & CEO of Community Foundation of Lorain County and Dawn Golba, Senior Program Officer of the Nord Family Foundation.

The John Longlais Award

Presented to The LCADA Way staff and Board members in recognition of their exceptional work in the field of addiction treatment and prevention.

Thomas D. Stuber presents the John Longlais Award to Brian Malone and Lea Heidman of Fighting for Alyssa

Keynote Speaker Steve Ford, son of President Gerald Ford and Betty Ford

Steve Ford shares how he negotiated his bumpy road from the White to successful 20-year career as an actor in Hollywood while dealing with personal and family battles of addiction and recovery.

SERVICES

The LCADA Way develops, provides and promotes these services in Lorain, Medina and surrounding counties:

Assessment Services

The LCADA Way assessment and screening services help an individual and family determine if there are addiction and/or mental health concerns. If it is a problem, the clinician will help determine the most appropriate care options based on the assessment findings. The LCADA Way follows Clinical Protocols for Levels of Care developed by the American Society of Addiction Medicine (ASAM) and the Ohio Department of Mental Health and Addiction Services (ODMHAS).

Intervention / Care-Vention

The LCADA Way provides Care-Vention Services to families struggling to help a loved one who is abusing drugs or alcohol. We understand that family members often feel frozen and helpless and often don't know what to do to get their loved one to stop using drugs. Through Care-Vention the family will become empowered to help their loved one see the reality of the consequences of their drug use in a caring way, will learn how to support one another and will help their loved one make the decision to enter treatment and begin to live a life of recovery.

Adolescent Services

The LCADA Way provides a supportive and caring environment for teens centered around four types of treatment: Intensive Outpatient Programming; In-Home Family Counseling; Low Intensity Programming; and ACRA Programming. Each of these programs utilize research-based models of care. Other services offered include individual and group counseling, education and relapse treatment, and prevention. Transportation is provided.

ACRA (Adolescent Community Reinforcement Approach)

ACRA is a comprehensive behavioral program for treating substance abuse related problems, based on the belief that environmental contingencies can play a powerful role in encouraging or discouraging drinking or drug use. It utilizes social, recreational, familial, and vocational re-enforcers to assist consumers in the recovery process.

Women's Services - The Key

The LCADA Way provides specialized drug and alcohol treatment to women suffering from substance use disorder. These services include: Residential Treatment to women and their children; Day Treatment; Intensive Outpatient Treatment; Low Intensity Treatment; Trauma Treatment; and Opiate Specific Treatment. The KEY provides a supportive and caring atmosphere 24-hours-a-day for women and their children recovering from substance abuse. Services include: Assessment; Individual and Group Counseling; Crisis Intervention; and Education on Alcohol/Drug Addiction and Recovery. Each client's treatment is individually tailored to her needs. Preschool age children can reside with their mother while she is in treatment. Intensive Outpatient Treatment for women is provided when there are adequate supports available to permit her to receive care on an outpatient basis. Transportation is provided.

Pregnant / Postpartum

Through a special grant from SAMHSA, The LCADA Way developed comprehensive alcohol and drug treatment services for women who are pregnant or have recently given birth. These services include rehabilitation, medical services, parenting training and coaching, vocational/educational placement and training, and assistance with housing supports.

In-Home Family Counseling

This service can be provided for clients who are engaged in treatment. In-Home counseling enables the clinician to provide outside resources for family needs, track a client's abstinence and encourage participation in 12 Step programs for the client and family.

Therapeutic Childcare and Parent Training

This program is designed to assess a child's developmental functioning, identify any developmental deficits, and address those deficits in a way that brings the child to age appropriate developmental levels. Services are modeled after Ages in Stages and are provided by a Children's Developmental Specialist. Children receive developmental services while their mother receives parenting coaching.

Medicated Assisted Treatment (MAT)

The LCADA Way provides medication assisted treatment to individuals struggling to recover from Opiate Addiction. Services are provided through a licensed The LCADA Way physician trained in addiction medicine. Clients must meet eligibility criteria and must be participating in primary treatment. Medication assistance may include Suboxone, Vivitrol, or Naltrexone.

Ambulatory Detoxification

The LCADA Way ambulatory detox program was created as a result of the overwhelming need for detox services for those suffering from opiate addiction and the limited availability of detox beds. Ambulatory detox is an outpatient detox service that assists the client through a safe, medically monitored withdrawal

SERVICES

from opiates. It includes a complete medical evaluation, medications to ease the distress of physical withdrawal, and immediate placement in the appropriate level of rehabilitation. Residential and Supportive Housing is available for those who struggle while receiving detox services. Clients who require subacute detox services will be assisted with placement in the appropriate medical facility.

Men's Outpatient Services

The LCADA Way provides specialized treatment services to men suffering from a substance use disorder. These services include Day Treatment with Supportive Housing; Intensive Outpatient Treatment (IOP); Low Intensity Treatment; Relapse Treatment; and Opiate Specific Treatment. Treatment is designed to facilitate the client's development of skills and tools that leads to sobriety and improved functioning in everyday life. This includes working with a client to accept their illness and recovery and to commit to utilizing sober support systems effectively. Services include Family Education; Family Treatment; Group and Individual Counseling; Relapse Treatment; Aftercare and Low intensity Outpatient Treatment. Specialized Opiate Treatment is available.

Recovery Housing

In partnership with Primary Purpose and Lorain County Mission, The LCADA Way provides sober housing combined with treatment services for those who require a safe and drug-free environment while participating in primary treatment. Those admitted will participate in clinically and medically appropriate services for the first phase of the program and will be able to stay in the Recovery Housing facilities following the completion of treatment while they continue to adjust to life without drugs. During the second phase, individuals will be assisted in gaining employment/ job skills through our partnership with Minute Man Human Resources and continue to receive ongoing recovery support.

Peer Supporters / Recovery Coaches

The LCADA Way is partnering with Let's Get Real and the Alcohol and Drug Addiction Services Board of Lorain County to provide clients with peer supporters as they begin ambulatory detox and/or participating in the symptomatic/pre-treatment program. As additional Peer Supporters become certified, it is our intent to expand their role to include those individuals receiving primary treatment.

Intensive Family Treatment

The LCADA Way has recently re-engineered our Family Treatment Services to focus on helping families struggling with an opiate addicted loved one. The program consists of disease and codependency education, family group therapy, and family support groups. Families can access this service even if their loved one is not in treatment at the time and can continue with the family support group/alumni group for as long as they find it helpful.

24-Hour Helpline

The LCADA Way provides a 24-hour-a-day, 7-day-a-week crisis helpline staffed by trained drug and alcohol treatment professionals. This helpline provides information regarding treatment options, healthcare, social services, and other government agencies that can provide assistance to an individual or family in crisis. These professionals are available to listen and talk through a crisis, anytime of the day or night.

Drug-Free Workplace Safety Program

The LCADA Way provides consultation and training to Lorain & Medina County businesses. We tailor training to each individual company and comply with guidelines provided by the Ohio Bureau of Worker's Compensation. The training is designed to educate management to deal with issues in a way that assists both employee and employer.

DOT-SAP (Department of Transportation/ Substance Abuse Professional)

The LCADA Way plays a critical role in maintaining public safety by facilitating access to a Substance Abuse Professional proficient in performing SWI/DUI, Department of Transportation (DOT) and Non DOT evaluations. Services include assisting companies when workers are removed for substance abuse matters, and screening to determine individuals have completed necessary recovery.

Tele-Health Counseling

Individual and Family Counseling is available via teleconferencing. Individuals must have access to internet services and have a webcam on their computer. The LCADA Way has contracted for teleconferencing through a firm that insures all appropriate encryption and meets HIPPA requirements.

Mental Health Counseling

The LCADA Way provides mental health assessment and counseling services for individuals suffering from depression, anxiety, trauma, codependency or other mental health disorders which are not medication driven. A skilled and caring Therapist assists the individual and family in developing effective coping strategies and/or bringing resolution to the issues that are troubling them.

SERVICES (continued)

Trauma informed Care
Unresolved trauma is a common issue among those suffering from substance use disorders. The LCADA Way utilizes Trauma Informed protocols and curriculum provided by Trauma Certified Clinicians to assist our clients with these issues.

Community Education Outreach and Prevention Services
The LCADA Way provides a variety of outreach, education and prevention services for Lorain County residents, students, and families. The goal of these programs is to teach individuals how to make the decision not to use alcohol, tobacco, and other drugs, to help young people make healthy decisions and to eliminate high risk behaviors associated with drugs and alcohol. These programs include six ODMHAS categories; Problem Identification and Referral, Information Dissemination, Community Based Services, Prevention Alternatives, Educational Services, and Environmental Services.

Eduvention Services
The LCADA Way provides this combined education and intervention program to teens and their parents identified through Juvenile Court who have engaged in early use of alcohol and/or other drugs.

Building Blocks Prevention
Building Blocks provides positive reinforcement to children, 3-6 years old, as they develop problem solving and social skills through interactive learning activities. Staff facilitate the program or can train parents and educators to utilize the program with youth in their lives.

Botvin's Lifeskills Program
The LCADA Way provides in school programing to elementary, middle, and senior high school students using the Botvin's LifeSkills curriculum. This is a 10-14 session curriculum that addresses critical life skills that the child needs. Additional programing specific to opiate and marijuana education/prevention is also included. This programing is critically important in helping students before they are put in a position to make the potentially life changing decisions about experimenting with drugs. Research of the LifeSkills curriculum repeatedly has shown it as an effective model in preventing alcohol and drug use as well as an effective gambling prevention strategy.

School-Based Prevention Model
The LCADA Way provides an Addiction Professional in contracted schools four hours per week. This staff is available for consultation with faculty, parents, and students. Services include: classroom or whole school presentations, education groups, staff trainings, policy review, drop-in hours, problem identification, consultation and referral services. Screenings can be provided as well as student education or staff in-service training.

School Liason
In partnership with Communities That Care, The LCADA Way provides support to the schools of Lorain County. This support includes assessing each individual school's needs and priorities and assisting them in connecting with providers who can best meet those needs.

Transportaion Services
The LCADA Way recognizes that transportation can be a major obstacle to a successful outcome for treatment. To address this, we provide transportation services to and from primary treatment for all adolescent clients, women clients and have just recently begun providing transportation to some of our men clients. Transportation is available to all engaged in our Medical Services.

Medicaid Enrollment
Currently one third of individuals seeking services do not have healthcare coverage and are eligible for Medicaid coverage. The LCADA Way provides a Medicaid Enrollment Specialist to assist in navigating the system and completing the enrollment process. Services provided to those who have registered for Medicaid can be started immediately and so there is no delay in a person's care.

Problem Gambling
The LCADA Way provides Gambling Assessment, Treatment and Prevention services to those suffering from gambling addiction. These services include: screening, assessment, and individual counseling. Prevention Services are provided through Botvin's LifeSkills and community awareness activities highlighting the "Be the 95 Percent" campaign designed by the Ohio Department of Mental Health and Addiction Services and the Ohio Lottery Commission.

Vocational Services
The LCADA Way is partnering with Minute Man Human Resources and Primary Purpose to provide employment training, placement, coaching, and monitoring.

Drug Courts
The LCADA Way provides services through both the Lorain and Medina County Family Drug Courts, Recovery Court and Veterans Court.

Ways to Give

Real Estate
Real Estate such as personal residences, farms, vacation homes, commercial and rental property is often the subject of gifts. Like gifts of appreciated securities, gifts of real estate can be attractive because of the double tax benefit – an immediate charitable contribution and the avoidance of capital gains tax.

Gifts-In-Kind
Gifts-in-Kind are goods and services whose worth cannot necessarily be counted in dollars, but provide an added benefit to the organization.

Pledges
Pledges may spread gift payments over a period of years. Many of The LCADA Way supporters have made multi-year pledges to the capital campaign and other avenues of support.

Life Insurance
You may purchase a new Life Insurance policy or simply donate a policy that you already hold but no longer need. Designating The LCADA Way as the owner and beneficiary of the policy can provide valuable tax benefits.

Cash
Cash is the simplest and most direct way to contribute to The LCADA Way. You may designate your gift for a specific purpose or you may choose to leave your gift undesignated to benefit the organization's area of greatest need. Cash gifts generally provide an immediate charitable income tax deduction for the amount of the gift.

Planned Gifts
Planned Gifts are a commitment to the future of The LCADA Way mission. Bequests, gift annuities, life insurance and retirement plan proceeds and various forms of gifts in trust are examples of planned gifts. You can realize an income tax deduction, avoid capital gains taxation and reduce or eliminate estate taxes while having a positive impact on The LCADA Way mission.

Matching Gifts
Matching Gifts are gifts offered by companies to encourage employees to support nonprofit organizations. Employers will match their employee contributions dollar for dollar, or in some cases, even double or triple the amount of the gift. Forms can be obtained from your Human Resources Department.
